COPYRIGHT BOOKS, FORWARDED FOR PRINTED TITLE CARDS

The catalog titles for books deposited for copyright registration for which printed cards are furnished to other libraries are prepared by the Catalog Division of the Library of Congress. These books are indicated in the Catalog of Copyright Entries by the printer's number attached to each title, which can be used in ordering printed title cards.

The books deposited in the Copyright Office divide themselves into two classes:

Class "a," books received with informal applications or informal affidavits, or without the registration fee; or without the data required in order to make the copyright registration.

In the case of these books, before any action can take place in the Copyright Office to indicate the registration number, correspondence must be had with the depositors. The necessary letters of inquiry are promptly dispatched, but it depends entirely upon the promptness with which replies to these letters of inquiry are received when these books can be numbered and forwarded for cataloging. They are, however, commonly the less important works and are not received from the leading or regular publishers, but from occasional depositors.

Class "b," books received with the necessary fee, application, and affidavit, and these documents in such order that the registration can be promptly proceeded with.

In the case of the books of class "b," the manner of handling them in the Copyright Office enables the larger number to be given promptly a registration number, and such books are sent forward from the Copyright Office for cataloging on the day of receipt, or the day following. These are usually books deposited by the regular publishers, and include, therefore, not only the greater part of the books deposited but also nearly all the important books.
